

Access to the web application

Firstly the entry page:

The screenshot shows the entry page of the OnTime web application. At the top, there is a purple header bar with the OnTime logo on the left and the text "Appointments in no time" in the center. Below the header, the page is divided into two main sections. The left section, titled "What is OnTime?", contains a brief description of the service and a "Discover more" link. The right section, titled "OnTime", contains a login and registration form with fields for "Email" and "Password", and buttons for "Login" and "Register". At the bottom of the page, there is a grey footer bar with the text "Logo by Félix Aguilar", "Calendar framework by FullCalendar LLC", "© 2018 OnTime", and "Powered by 000webhost".

What is OnTime?

Every now and then everyone has to make an appointment with a professional like, for example, a dentist or hairdresser. In these cases, many of us can't spend the time in going to the establishment in person and, even if we can contact with the business by telephone, we will need to make each appointment separately which will cost us time.

And that's why we created OnTime: a place where individuals and business contact each other in a fast and easy way. By creating your own appointment calendar, you will be able to make requests for appointments in a matter of clicks and, if you are representing a company, you can manage your company's requests and decide which hours to appoint.

Here we can access the application with our email and password or we can register. We included a brief description of the project.

To test all the features we will register as an individual and as a company:

This is a close-up screenshot of the login and registration form from the previous image. It shows the "OnTime" title, the "Email" and "Password" input fields, and the "Login" and "Register" buttons. The "Register" button is highlighted in green.

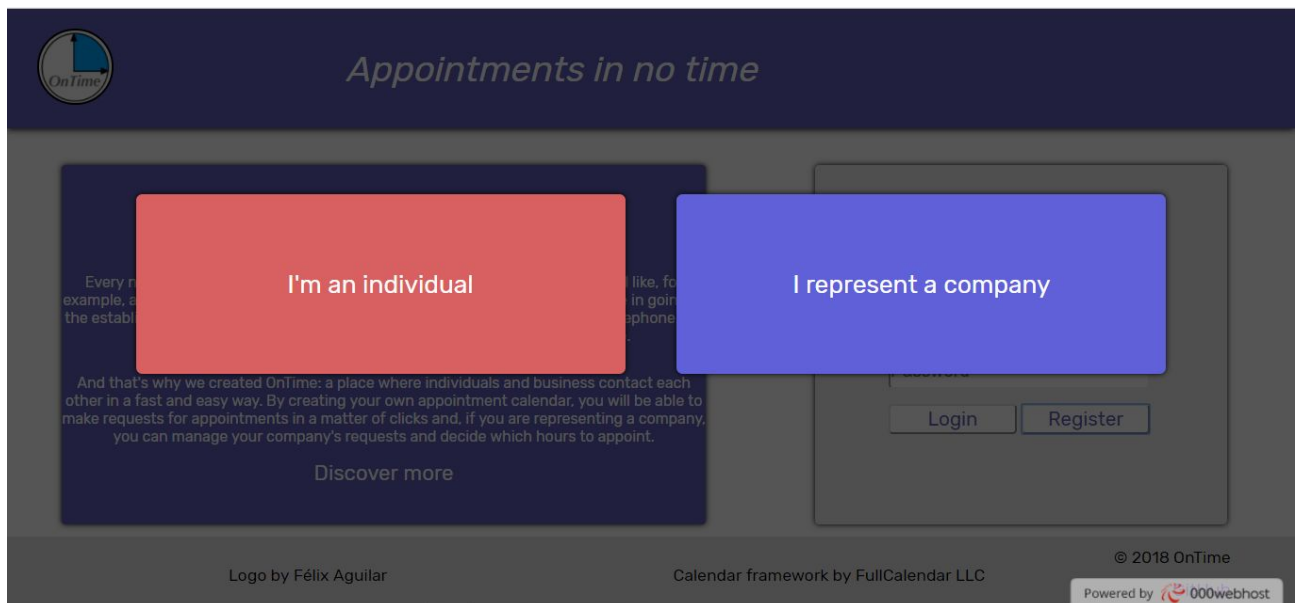

OnTime

Email

Password

[Login](#) [Register](#)

Once we click the register button, we will be prompted to choose between individual and company:

We start as an individual:

A registration form titled "Individual's Data" on a blue background. It contains several input fields with the following text: "Javi", "Marin", "javiermarinbergas@gmail.com" (highlighted in yellow), "647477519", and two fields with three dots "...". A "Register" button is located at the bottom right of the form.

Once we have completed the form, we register.

Thank you, Javi Marin

We have sent a confirmation email to javiermarinbergas@gmail.com

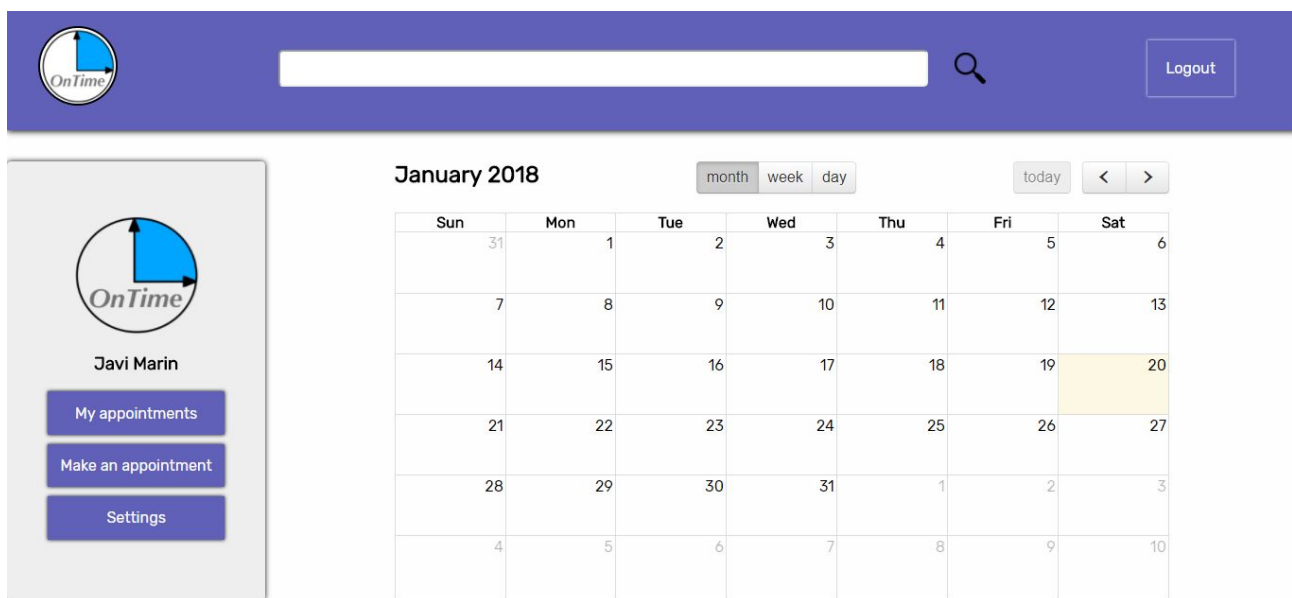

Next we register as a company:

Individual's Data	Company's Data
<input type="text" value="Paco"/>	<input type="text" value="Dentista"/>
<input type="text" value="Lopez"/>	<input type="text" value="45"/>
<input type="text" value="paco@gmail.com"/>	<input type="text" value="paco_dentista@gmail.com"/>
<input type="text" value="675341290"/>	<input type="text" value="971456789"/>
<input type="text" value="..."/>	Sectors <input type="text" value="Health"/>
<input type="text" value="..."/>	<input type="button" value="Register"/>

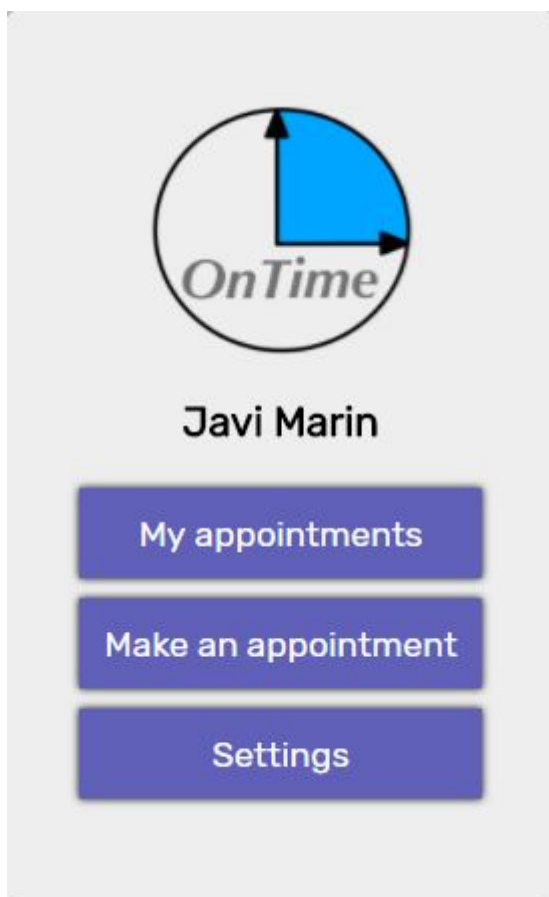

Now we test the login functionality:

OnTime

The main page has a personal calendar (provided by FullCalendar LLC under MIT License) that contains all the events of an individual:

Since we just registered, we don't have any events.

To our left we have a sidebar with the main functionalities of the application:

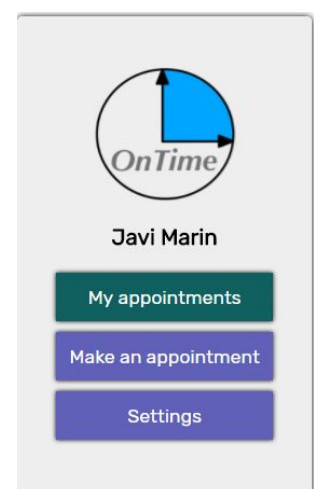

My appointments:

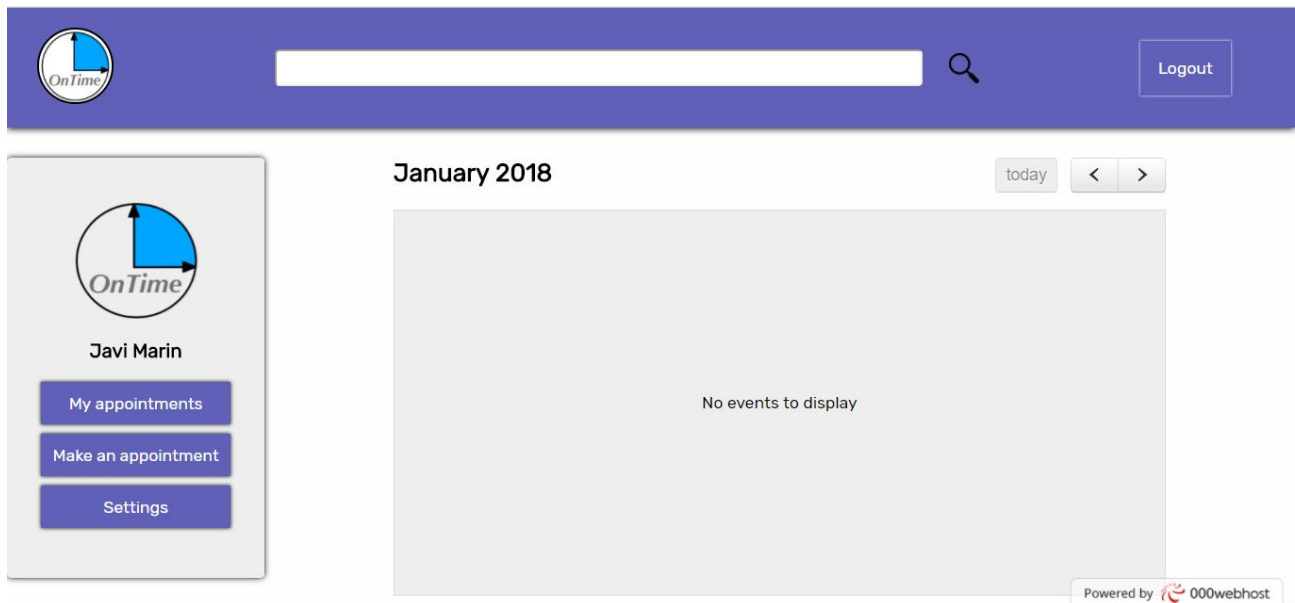

Redirects to the agenda where all the events are shown together.

Make an appointment: Shows all the companies in the database.

Settings: Allows to customize the interface with 2 colors and a profile picture.

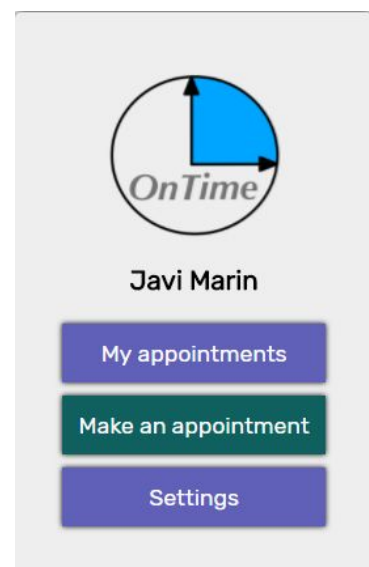

We try the option
"My appointments" →

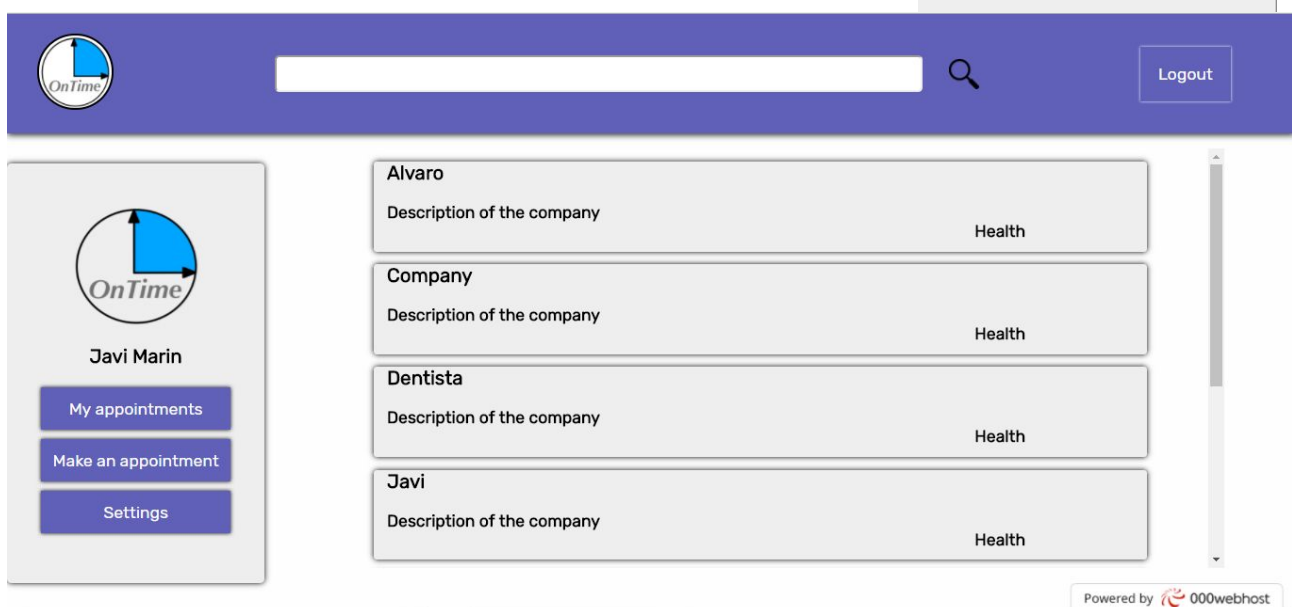

Since we don't have any events, the agenda is empty.

We make an appointment to check both its functionality and the agenda's:

We can see below how a list of all the companies appear.

We click in their respective box to ask for an appointment, once we click, a calendar with their available ours will appear. In our testing case we make a request for “Dentista”:

Dentista

January 24, 2018

month

week

My appointments

Requests 2

Make an appointment

Settings

We accept the first one (January 24th) and decline the second one (January 25th). After that we get back to the main calendar to see it take effect:

Now, as the individual user who requested the appoint, the application alerts us via email:

<input type="checkbox"/> ☆  javimarinbergas	Your request has been declined - Your appointment with Dentista has been declined.	13:51
<input type="checkbox"/> ☆  javimarinbergas	Your request has been accepted - Your appointment with Dentista has been accepted. Start: 2018-01-24T06:00:00	13:51

We log again as an individual to see the changes:

We can see how the appointment for January 24th is in the main calendar.

21	22	23	24 Unavailable	25	26	27
28	29	30	31	1	2	3

Next, we will change the settings to customize the interface:

The image shows a web application interface for 'OnTime'. At the top, a user profile card for 'Javi Marin' is displayed, featuring the 'OnTime' logo and three buttons: 'My appointments', 'Make an appointment', and 'Settings'. Below this is a purple navigation bar containing the 'OnTime' logo, a search bar, and a 'Logout' button. The main content area is divided into two sections. On the left is a sidebar with the same user profile card. On the right is a settings form titled 'Change your profile picture' and 'Change the Color'. The 'Change the Color' section includes two color pickers labeled 'Main Color' and 'Second Color', both of which are currently set to blue. A 'Save' button is located at the bottom of the settings form. At the bottom right of the page, there is a footer that reads 'Powered by 000webhost'.
